## INSTRUCTIONS

These instructions are intended for the guidance of persons making reports to the Superintendent Car Service, Philadelphia, Pa.

### FREIGHT CONDUCTORS

1. A Car Report must be made to the Superintendent Car Service of every train moved, using forms C.T. 1034 and 1034A, for all freight trains in road service, forwarding by first train to Superintendent Car Service Form C.T. 1034A enclosed in C.T. 1167 envelope and C. T. 1034 to Supervisor of Regional Expenditures of respective Region. FULL INSTRUCTIONS FOR THE PREPARATION OF C.T. 1034 AND C.T. 1034A ARE PRINTED ON THE BACK OF FORM C.T. 1034.

Form C.T. 1034B may be used by the conductors engaged in switching service.

Form C.T. 1034C must be used by conductors in charge of work trains and construction trains, showing all cars moved in the train, whether regularly assigned to work service, or only temporarily engaged in this work. This form must be used in reporting the movements of material and supply trains, gravel and ballast trains, wrecking trains, repair trains, snow plows and flangers.

2. The name of the Division on which the train originates must be shown at the top of Form C.T. 1034, C.T. 1034A, C.T. 1034B and C.T. 1034C, and the name of the Home Division must be shown in space provided for that purpose.

If a train consists of an engine without cars, or an engine and cabin, the word "Light" must be written across the face of the report. Helping engines returning light, foreign trains detoured, foreign engines running under their own motive power with pilot in charge and home trains detoured over foreign roads must be shown on C.T. 1034 or C.T. 1034B.

3. DATE THE CAR REPORT ACCORDING TO THE ACTUAL TIME OF DEPARTURE, REGARDLESS OF THE TIME TRAIN IS SCHEDULED TO LEAVE. When train leaves starting point exactly at midnight, show departure time 12.01 A.M. and date report accordingly.

Use the Standard Time in effect on the Division over which the movement is being made.

Show symbol of train, train number, section number and kind of train, and full name of the Division or road over which the train moves, and the direction. Enter on the report the route train moves, if diverted from its usual route, or if there is more than one route via which the trip is made.

4. Beginning at the engine, show each car as it

stands in the train at the beginning of the trip. The cabin car must be shown in the space provided at the head of the report.

Care must be exercised to include on the report all cars moved, and that the total number of cars in train is shown in space provided for that purpose.

When wrecked cars, or dead engines and tenders, are moved loaded on other cars, they must be considered the same as any other lading, and the initials and numbers of the carrying cars must be reported only.

When two or more cars are required to carry lading on account of its length, the initials and numbers of all cars, including the idlers, must be reported.

New cars moving empty on revenue card waybills must be reported as empty.

Report each dead engine and each tender not in service when moving on their own wheels, showing the initials and number of each as loaded, using a separate line for each engine or tender, and report them in the order in which they stand in the train, marking them "Engine" or "Tender."

5. Use numbers or letter abbreviations of stations or sidings, as shown in C.T. 1000, to indicate points from which cars are moved or set off.

Care must be exercised not to use telegraph calls, telegraph towers or numbers in use in any other publication. When no number or abbreviation is assigned to a station or siding where cars are picked up or set off, the full name must be written in.

When several stations or sidings are included in a brace with but one abbreviation, that abbreviation must be used for all points included therein. Movements between points covered by the same brace must not be reported.

**THE REPORTING MARKS APPEARING OVER THE CAR NUMBER MUST BE USED TO SHOW THE INITIALS OF THE CAR.**

Letters and figures must be plain and carefully confined to the space provided on the reports.

### PASSENGER CONDUCTORS

6. A Car Report must be made to the Superintendent of Car Service for every train moved. Reports must be made in duplicate by use of carbon paper.

Form C.T. 1023A must be used for reporting through passenger trains.

Form C.T. 1024A must be used for reporting local passenger trains, showing each trip in the order in which the trip was made, and all the trains handled on one date must be shown on one report. This form must be used also in reporting official trains, inspection trains, etc., and must be marked in such a manner that the train may be easily identified.

Use numbers or letter abbreviations of stations or

sidings as shown in C.T. 1000 to indicate points from which cars are moved or set off.

The following abbreviations must be used to designate commodity:

M .....	Mail	MK .....	Milk
MS .....	Mail Storage	EC .....	Empty Milk Cans
EX .....	Express	FT .....	Freight
BG .....	Baggage	X .....	Cars with Passengers
PK (under package stamp) ..	Baggage	- .....	Empty Cars
NP.....(newspapers in bulk)	Baggage		

The following abbreviations must be used to designate kind of car:

Passenger Equipment				
PC ....Parlor Coach	P .....	Passenger	PO .....	Postal
PL ....Parlor	V .....	Business	PS .....	Postal Storage
DC ....Diner Coach	PB .....	Pass.-Bagg.	Exp .....	Express
DN ....Dining	PBM..	Pass., Bagg. and Mail	RE..	Refrigerator Exp.
DP ....Diner Parlor	PLB .....	Parlor-Bagg.	BE .....	Box Express
SL ....Sleeper	BG .....	Baggage	HC .....	Horse-Carriage
OB ....Observation	BM .....	Bagg.-Mail	EC .....	Emergency

These reports must be turned in promptly at point designated by the Superintendent, who must arrange for the prompt forwarding of the original report to the Superintendent Car Service and the carbon copy to Supervisor of Regional Expenditures.

#### INTERCHANGE REPORTS

7. Each car interchanged with a foreign railroad must be reported to Office of Superintendent Car Service by the Agent or Yard Master in charge on the established form of interchange report. In the absence of instructions to the contrary, the reports must be made daily and closed at midnight to include all cars interchanged during previous twenty-four hours. All initials and car numbers must be written distinctly and the writing kept within the space provided on the report. No ditto marks to be used in preparation of these reports. Care must be exercised to insure good and legible carbon copies. The sheets must be numbered consecutively beginning with the first of each month, a separate series of numbers for each road interchanging cars.

In cases where there are different standards of time at an interchange point, the more Easterly time must be used.

The reports must be signed by the proper representative of the delivering road and certified to by the proper representative of the receiving road, after careful checking. Forms C.T. 1019D, C.T. 1019E and C.T. 1019F, must be used in reporting all cars delivered to connecting lines, except where the daily average num-

ber of cars delivered is less than ten (10) when C.T. 1019A, C.T. 1019B and C.T. 1019C must be used. Four copies of the wide sheet and one copy of the pink and yellow narrow sheet must be made. The pink sheet and one copy of the wide white sheet, showing cars delivered to connecting lines, must be forwarded promptly to the Superintendent Car Service, Philadelphia, Pa., and the yellow narrow sheet and two wide white sheets must be furnished the Agent of the receiving line for his file and for the use of his Car Service Department.

The connecting delivering line will furnish each Freight Agent or Yardmaster in charge of the interchange with one yellow sheet and two white sheets, the yellow sheet and one white sheet to be forwarded promptly to the Superintendent Car Service, after checking, and one white sheet retained for file.

#### SEPARATE REPORTS MUST BE FURNISHED SHOWING INTERCHANGE OF PASSENGER EQUIPMENT AND NUMBERED IN SEPARATE SERIES.

Car Service Rule 7 governs the delivery of cars, the date and time of delivery of cars upon the interchange tracks shall prima facie be the date and time given by the delivering road.

#### CAR SERVICE RULE 7

"Cars shall be considered as having been delivered to a connecting railroad when placed upon the track agreed upon and designated as the interchange track for such deliveries, accompanied or preceded by proper data for forwarding and to insure delivery, and accepted by the car inspector of the receiving road.

"Unless otherwise arranged between the roads concerned the receiving road shall be responsible for the cars, contents and per diem after receipt of the proper data for forwarding and to insure delivery, and until they have been accepted by its inspector or returned to the delivering road."

Reports must show the final destination of all loaded cars and if empty cars are carded to a given point the destination must be shown. The final destination must be shown even if the car is not billed through.

All Interchange Reports must be checked by the Agents or Yardmasters of both roads and their correctness certified to. Supplementary Interchange Reports must not be numbered but the word "Supplementary" must be written in the space provided for the sheet number. Date of interchange must be shown in space provided and a notation reading "Supplementary Report issued \_\_\_\_\_" written across face of all four copies of the wide white sheets. The original report must not

be delayed and any errors or corrections should be made on Form C.T. 1095, in accordance with instructions printed on the blank.

Reports must be forwarded to Superintendent Car Service, Philadelphia, Pa., in envelope, Form C.T. 1167.

#### C.T. 1138 REPORT OF CARS HELD FOR DELIVERY TO CONNECTING ROADS UNDER PER DIEM RULE 15

8. When cars upon which no embargo has been placed are not accepted by connecting line prior to midnight, such cars are subject to per diem reclaim. This will also apply to cars against which connecting lines have placed embargo, if cars were already loaded, or loaded within 24 hours after the date of the embargo, as evidenced by the billing accompanying the car.

The delinquent line MUST be notified, daily, prior to midnight, of the total number of cars held at or back of junction point, and of our intention to make reclaim, covering detention of same on our rails, and the Superintendent Car Service MUST be furnished with the proper information by wire, as per detailed instructions appearing on reverse side of Form C.T. 1138.

Within 48 hours, the delinquent line must be furnished with Form C.T. 1138, showing initials and numbers of the cars held, as of 11.59 P.M.

#### C.T. 1039 REPORT OF CARS IN TERMINAL OR INTERMEDIATE SWITCHING SERVICE

9. This report must be made in duplicate and both copies forwarded to the Office of Superintendent Car Service, at the close of each month after having been certified to by Agent or representative of the line for which the switching was performed.

Report must show the initials and numbers of all cars switched, including System cars and all information called for in the heading of each column, as provided for in Per Diem Rule 5. Cars handled in intermediate switching are subject to one day's per diem reclaim only when one day's per diem accrues.

When there are no cars to report, send a blank form, dated and signed, and write across the face "No Cars to Report."

#### C.T. 545

10. This form must be used for making report to the Office of Superintendent Car Service, of freight cars of railroad ownership detained by reason of railroad error, which prevents proper tender or delivery. After receipt of data for disposal of car, report must be made in triplicate, showing full information called for and original and one carbon copy forwarded to the Superintendent Car Service. The Agent making the report must retain the remaining copy.

The privilege of per diem reclaim on cars detained account of railroad error is predicated on the provisions of Per Diem Rule 14.

Care must be taken to furnish complete details, showing date of first notice to erring road, and date disposition was furnished. Reclaim is based on the notices given and received.

#### C.T. 228 REPORT

11. A report on Form C.T. 228 must be made of any accident to cars, loaded or empty, which necessitates their being sent to shops, giving point at or near which the accident occurred, and all cars found damaged, even if it is not possible to locate the point where damaged or cause thereof.

This form must also be used for reporting loss or damage to lading enroute, due to leakage or accident, and transfer of lading in consequence thereof, and all cases where loss of lading is discovered by reweighing of car, or otherwise, showing the actual, or estimated, amount of lading lost, and full manifest information in all cases. This form must also be used when all, or any, portion of lading in carloads is taken for Company use due to accident or defective equipment.

Report must be made immediately at time of accident, and if full details cannot be given, mark report "Preliminary" and follow up promptly with supplementary report giving full details.

If damage is caused by fire, show cause of fire, amount of damage, and how fire was extinguished.

When form C.T. 228 is used to report damage to, or destruction of, equipment by fire, it will not be necessary to make out form I.D. 7 report to the Insurance Department.

A copy of C.T. 228 report must be sent to each of the following:

Superintendent Car Service, all cases;

Freight Claim Agent, when transfer of lading or loss or damage to lading occurs;

Superintendent Motive Power, when cars are damaged or destroyed;

M.C.B. Clearing House, Altoona, Pa., when cars are damaged or destroyed by fire or otherwise;

Manager Insurance Department, when cars are damaged or destroyed by fire;

Other copies as may be directed by Superintendent or General Superintendent.

#### C.T. 321 REPORT

12. Report promptly in every case, on Form C.T. 321 when all or any portion of lading in carloads is transferred from one car to another.

In case transfer of lading is reported on Form C.T. 228, in connection with report of accident, no report on Form C.T. 321 is necessary.

When reporting the transfer of lading from a tank car to another tank car, a notation must be made on report to show full information as to point of shipment,

shipper, consignee and destination of the empty tank appropriated to receive the contents of the damaged car.

#### C.T. 322 REPORT

13. Report promptly in every case, on Form C.T. 322 when all or any portion of lading in carloads is taken for Company use and not reported on C.T. 228.

#### C.T. 1001 REPORT

14. When new Individual or Company sidings have been installed, or a relocation of Individual or Company trackage, or any change in tracks that affects information shown in C.T. 1000, a report must be made on Form C.T. 1001. The original report must be sent to the Superintendent Car Service and two (2) copies to the Division Freight Agent.

A prompt report must be made of any changes in name of siding or name of siding owner, taking care to show the trade name, and where a new colliery has been opened, or where a change has been made in colliery operators, give full name of colliery, along with the name of operator. Also a report must be made when sidings are eliminated.

Siding and station abbreviations to be used in making reports to Office of Superintendent Car Service will be assigned by that office, and abbreviations for new sidings, or changes in abbreviations must not be made without first obtaining authority therefor.

#### C.T. 1022 REPORT

15. Shop Foreman must report daily on Form C.T. 1022 the initials and numbers of all cars received in shop and on shop sidings under the jurisdiction of the Shop Foreman, and turned out for service from midnight to midnight, including cars loaded with Company material.

The cars repaired in trains and on yard tracks, by Car Inspectors, must not be reported.

The C.T. 1022 form is a "cut-up" form, and it is, therefore, essential that all writing be kept within the space provided. In the columns of the "cut-up" portion provided for "date in" and "date out" of shops, the dates shown must be same as date entered at top of report. Ditto marks must not be used.

Show on back of report in space provided, the initials and numbers of all cars torn up or built, including all cars damaged on the road and subsequently torn up at shops. When marks on cars are changed give full explanation.

When a damaged car is loaded on another car and sent to shops, the initials and number of the damaged car must be shown on report, and a notation made to that effect.

When there are no cars to report send a blank, dated and signed, and write across the face "No Cars to Report."

#### C.T. 1098, C.T. 1098A AND C.T. 1098B REPORTS

16. A daily report on Form C.T. 1098, C.T. 1098A or C.T. 1098B must be made of all carloads billed, weighed or reconsigned from scales. Show the full route in all cases.

Shipments of coal or coke to points short of scales billed at estimated or shipper's weights must also be reported on this form by the Agent waybilling such shipments.

When there are no cars to report, send a blank, dated and signed, and write across the face "No Cars to Report."

#### A.D. 5291 REPORT

17. Report on this form every car which has been billed and subsequently reconsigned to a new consignee or a new destination; also when a car has route changed enroute, and also when a car is delivered and unloaded in error by the wrong consignee.

Enclose reports to Superintendent Car Service in perforated envelope C.T. 1167.
